

The following lists the platforms which can be a GT-SUITE license server. We do not support a license server on a virtual machine of any kind. If the platform is listed as "No", it can not be a license sever and if it is a supported GT-ISE platform (<http://www.gtisoft.com/platform.htm>), it must use a license from a supported license server platform.

Windows

Architecture \ version	2000	XP Pro	Vista	2000/2003 server ***
x_86, 32 bit	Yes	Yes	Yes *	Yes *
x_86, 64 bit	--	Unofficially **	Unofficially * - **	Unofficially * - **

* - Must install from build 8+ CD

** - 32 bit drivers are used and have been trouble free, but can not be 100% guaranteed.

*** - Only supported as a licensing server, not for GT-ISE/solver.

SUSE – Open SUSE

Architecture \ version	8.2	9.X	10.0-10.2	10.3
x_86, 32 bit	Yes	Yes	testing	No, Driver issue
x_86, 64 bit	Unofficially **	Unofficially **	testing	No, Driver issue

** - 32 bit drivers are used and have been trouble free, but can not be 100% guaranteed.

SUSE – Enterprise server

Architecture \ version	9	10
x_86, 32 bit	Yes	testing
x_86, 64 bit	Unofficially **	testing
IA_64 (Itanium)	Yes	Yes

** - 32 bit drivers are used and have been trouble free, but can not be 100% guaranteed.

RedHat Linux

Architecture \ version	7	8	9
x_86	No	No	Yes

RedHat Enterprise Server

Architecture \ version	3	4	5
x_86, 32 bit	Yes	Yes	Not tested
x_86, 64 bit	Unofficially **	Unofficially **	Not tested
IA_64 (Itanium)	Yes	Yes	Not tested

** - 32 bit drivers are used and have been trouble free, but can not be 100% guaranteed.

Solaris

Architecture \ version	2.8 (8)	2.9 (9)	2.10 (10)
SPARC	Yes	Yes	Yes
x_86	No	No	No

IBM AIX

Architecture \ version	5.1
	Yes

HP-UX

Architecture \ version	11	11i
PA-RISC	Yes	Yes
x_86	No	No
